- Land Rover LR4

Common Problems with Land Rover Lemons

Land Rovers often have:

- Air suspension problems
- Electrical problems
- Oil Leaks
- Leaky sunroofs
- Airbag defects
- Parking brake failure
- Steering shaft problems

Your Land Rover might be a lemon if it doesn't start if it has electrical problems such as heating, air conditioning, windows, door locks, fault navigation and speaker systems, or noise coming from the tires, axles, and brakes. If the sunroof in your Land Rover starts to leak, it could be due to pinched sunroof drains OR it could be a sign of a lemon if your car is under 50,000 miles.

More signs of lemons could be issues with fuel gauges and fuel injectors, engine malfunctions such as stalling, shutting off, or even vibration. Air Suspension in Land Rovers tends to sag after 6 years, but if it's earlier, it may be a lemon. Finally, any steering misalignment and vibration or airbag malfunction often and early point to the possibility of a lemon. ***If you have a single or multiple recurring problems on this list, it's time to take action to see if you have a lemon on your hands.***

Does My Land Rover Qualify as a Lemon?

If your vehicle is under factory warranty, California Lemon Law applies to your case. You must have attempted four repairs of the same defect or two for a defect that can cause serious injury or death. Additionally, if you can't use your vehicle for at least thirty days, the problems might trigger California's lemon laws.

To qualify for compensation under the California Lemon Law, your land rover must meet ONE of the following conditions:

- 4 or more repairs for the same defect that began while under initial factory warranty.
- 2 repair attempts for a defect that could cause serious bodily injury or death while under factory warranty.
- Out of service 30 cumulative days while under the factory warranty.
